

BACTICLEAN

Bactericidal Cleaner & Sanitiser for Hard Surfaces

BACTICLEAN has been specifically formulated to effortlessly clean and sanitise hard surfaces, effectively removing fats, dirt, grease and grime, leaving a pleasant and long-lasting fragrance. Ideal for use in washrooms/bathrooms, leisure centres, hotels, hospitals and ambulances.

BENEFITS

- Kills 99.99% of bacteria
- Passes BSEN 14476, 99.99% reduction against enveloped viruses incl. coronavirus
- Highly Economical
- Two-in-one product, cleans and sanitises
- Multipurpose
- Ideal for use in hospitality or patient areas

BIOCIDAL ACTIVITY

Independent tests have shown BACTICLEAN passes stringent BSEN 14476 testing, thus proven effective against enveloped viruses including all coronavirus (@10:1). It has also passed BSEN 13697 in dirty conditions, thus proven effective against bacteria (@50:1).

KILLS 99.99% OF BACTERIA

BACTICLEAN kills 99.99% of bacteria, fast. The innovative formulation can kill even the toughest bacteria, whilst removing fats, dirt and grease from virtually any hard surface, making it perfect for contact areas.

EFFECTIVE AGAINST ENVELOPED VIRUSES, PASSES BSEN 14476

BACTICLEAN has been specifically formulated to prevent the spread of enveloped viruses. The advanced formulation has passed BSEN 14476 testing at a 10:1 dilution. It effectively deactivates enveloped viruses including coronavirus, achieving a 99.99% reduction in 15 minutes.

HIGHLY ECONOMICAL

Thanks to its advanced formulation, BACTICLEAN can be used in a highly diluted form, making it exceptionally economical. Even at concentrations of 80:1, BACTICLEAN quickly and easily disinfects hard surfaces.

TWO-IN-ONE PRODUCT, CLEANS & SANITISES

The specialist biocidal properties of BACTICLEAN mean it is capable of cleaning and disinfecting hard surfaces with ease, making it ideal for high traffic areas. This ability extends to even the hardest to reach areas, thanks to the atomised delivery of BACTICLEAN.

MULTIPURPOSE

BACTICLEAN can be used in a wide variety of settings, including hospitals, hotels, restaurants, leisure centres and ambulances. It has been expertly formulated as a multipurpose product, suitable for metals, plastic and even painted surfaces. Its rapid wetting ability makes it suitable for large grease spillages because it doesn't 'bead up' and covers the entire surface area.

IDEAL FOR USE IN HOSPITALITY OR PATIENT AREAS

The pleasant, long lasting fragrance of BACTICLEAN makes it ideal for use in hospitality and patient areas, such as front of house in a restaurant for floors and walls, public toilets and even emergency service vehicles.

DIRECTIONS FOR USE

For optimum economy and performance, we recommend cleaning solutions are prepared using automatic dilution equipment. If auto-dosing is not available a stork (or pelican) pump can be placed into a 5 litre bottle of BACTICLEAN concentrate.

TRIGGER SPRAY

1. Fill the trigger bottle as per the dosing instructions below
2. Spray the diluted product onto the surface to be cleaned
3. Allow 30 seconds for the cleaning solution to penetrate the grease
4. Wipe the surface clean with paper towel
5. Spray and wipe again to sanitise surface

BOWL OR SINK

1. Fill the bowl or sink as per dosing instructions
2. Immerse the items to be cleaned and wipe over with a cloth, brush or sponge to loosen grease and soiling.
3. Allow to drain dry or wipe dry with paper towel

HAND SWABBING

1. Fill bowl as per dosing instructions below
2. Apply the diluted product from the bowl or bucket using a cloth or sponge, wiping over the surface to break down dirt and grease
3. Remove excess cleaning solution with paper towel and wipe until dry

MOP & BUCKET

(Suitable for cleaning floors)

1. Fill bucket as per dosing instructions below
2. Apply the diluted product using a mop which has been soaked in the cleaning solution then wrung to almost dry (damp mopping)
3. For stubborn soiling allow a little more solution into the mop and work into the floor to loosen dirt
4. Dry the floor with the wrung-out mop

DOSING INSTRUCTIONS

CLEANING TECHNIQUE	DOSING	DILUTION RATE
Trigger Spray Spray on & wipe off	56ml BACTICLEAN / Two pumps from a pelican pump, topped up to 544ml with water	10:1
Trigger Spray Spray on & wipe off	28ml BACTICLEAN / One pump from a pelican pump, topped up to 572ml with water	20:1
Washing items in a bowl	28ml BACTICLEAN / One pump from a pelican pump can be made up to 2 litres to obtain a dilution rate of 80:1	50:1 to 80:1
Swabbing from bowl or bucket	28ml BACTICLEAN / One pump from a pelican pump can be made up to 2 litres to obtain a dilution rate of 80:1	50:1 to 80:1
Mop and bucket	28ml BACTICLEAN / One pump from a pelican pump can be made up to 2 litres to obtain a dilution rate of 80:1	50:1 to 80:1
